OBJECTIVE

Technical Project Manager with strong engineering background (12+ years). Seeking to leverage technical leadership, cross-functional coordination, and project delivery experience to build scalable systems and drive successful product initiatives.

WORK EXPERIENCE

MindX Technology School

Staff Engineer / Interim Engineering Manager / Technical Project Lead | *Apr 2022 – Present*

- * Led end-to-end architectural migration from Monolith → Microservices + Event-Driven Architecture, managing scope, technical risks, and cross-team dependencies.
 - * Planned and delivered the Mobile Compass Application using Capacitor, coordinating between mobile, backend, and QA teams.
 - * Standardized CI/CD pipelines (Azure DevOps), improving release reliability and reducing deployment time.
 - * Facilitated project planning, breaking down initiatives into clear milestones and technical deliverables aligned with product goals.
 - * Conducted technical risk assessments (De-risking) for new strategic projects, providing mitigation plans to stakeholders.
 - * Managed engineering processes during Interim EM periods: sprint planning, performance tracking, dependency management.
 - * Collaborated closely with Product Managers to translate product vision into actionable technical roadmaps.
 - * Reviewed and approved technical designs, ensuring alignment with long-term architecture and business strategy.
 - * Mentored engineering teams, driving adoption of DDD, Clean Architecture, and modern development practices.
-

OpenCommerce Group

Tech Lead / Project Coordinator | *Nov 2020 – Nov 2021*

- * Coordinated development initiatives for Growth Products across multiple teams (Backend, DevOps, Frontend).
 - * Designed and delivered new microservices and merchant mobile applications, ensuring smooth integration and release timelines.
 - * Planned sprint activities and translated Marketing/Growth requirements into executable tasks.
 - * Ensured delivery quality through code review, performance optimization, and tech debt reduction.
 - * Worked with DevOps to align CI/CD improvements with project milestones.
 - * Supervised a team of 5+ developers, handling task assignment, progress tracking, and continuous evaluation.
 - * Collaborated with business stakeholders (Marketing, Sales, Partners) to define roadmap and feature priorities.
 - * Participated in hiring, performance review, and team development.
-

Mytour.vn

Team Leader / Technical Project Lead | *Aug 2016 – Apr 2020*

- * Led and coordinated a cross-functional team of 10+ Developers and QA in delivering features for Mytour.vn's core platform.
 - * Managed complete project lifecycle: requirement clarification, sprint planning, delivery tracking, review, and reporting.
 - * Planned quarterly & annual IT initiatives, aligning engineering execution with business KPIs.
 - * Oversaw infrastructure operations and ensured system stability (performance monitoring, incident handling).
 - * Facilitated daily/weekly meetings, removed blockers, and ensured on-time delivery.
 - * Introduced new technologies to improve performance, scalability, and operational stability.
 - * Collaborated with stakeholders across Sales, Marketing, and Operations to define feature priorities and product direction.
 - * Prepared detailed progress reports for IT Manager and leadership team.
 - * Handled HR-related responsibilities: interviewing, performance evaluation, mentoring.
-

QueenB JSC

Fullstack Developer | *Sep 2015 – Jul 2016*

- * Delivered full-stack features using HTML/CSS, CodeIgniter, and WordPress.
 - * Participated in full development lifecycle and coordinated with designers and project managers.
-

Y Tuong Viet JSC

Fullstack Developer | *Jun 2013 – Feb 2014*

- * Built custom CRM modules and web solutions aligned with client requirements.
 - * Maintained hosting assets, handled internal IT support, and communicated directly with clients.
 - * Delivered tasks on time and prepared reports for management.
-

SKILLS

Project & Delivery Management

- * Agile/Scrum, Sprint Planning, Backlog Prioritization
- * Risk Management & Technical De-risking
- * Cross-functional Team Leadership
- * Stakeholder Communication & Alignment
- * Roadmapping & Milestone Planning
- * Reporting & Executive Communication

Technical Leadership

- * Software Architecture (Microservices, DDD, Clean Architecture)
- * System Design & Solutioning
- * Code Review & Quality Oversight
- * Technical Decision-making

Technical Background

- * Backend: PHP, Node.js, Golang, Python
 - * Frontend: React.js, Vue.js, Next.js
 - * DevOps: Docker, Kubernetes, GitLab CI, Azure DevOps
 - * Databases: MySQL, PostgreSQL, MongoDB, Redis
 - * Messaging: Kafka, RabbitMQ
 - * Big Data tools: Apache Spark (fundamentals)
-

EDUCATION

Thanh Do University *Information Technology (2009 - 2014)*

PUBLIC SPEAKING & CONTRIBUTIONS

- * Laravel Meetup Vietnam (2022) *Topic: Scaling, Microservices, Database Optimization*
 - * NVM Cafe Tech Talk (2023) *Topic: Microservices Architecture in Production*
-
